As European Clinical Research Organization (CRO) we are supporting biotech companies in bringing new and innovative therapies to market. Through a succession situation, the company has new owner-operators and we are now modernizing the company, while maintaining its “DNA”. Hence, we are a dynamic “start-up” with 30 years of knowledge!

JOIN OUR TEAM! As of now we are looking European-wide for (full-time or part-time)

Senior Clinical Data Manager (m/f/d)

What We Offer You

- An experienced team passionate about making the world a better place through clinical research
- Opportunity to work with an internationally and culturally diverse team
- Fully remote work (you are welcome at any MONIPOL office anytime)
- Great perks (autonomy, flexible working hours, hardware budget, co-working space allowance, and team events)

Your Opportunity With Us

As Senior Clinical Data Manager you will be supporting the development of our Data Management department and carry out data management aspects for projects, including:

- Supervision of clinical trials and studies of all phases and indications
- Development of Data Management processes for eCRF development, eCRF completion guidelines, EDC set-up, UAT, edit checks, data review and query resolution, locking activities, and reporting
- Supporting the development of the Data Management department
- Training and team lead for junior data managers
- Programming and creation of eCRFs, databases, and reports (SQL)
- Programming and validation of electronic checks
- Creation of data management and data validation plans, as well as coding of clinical datasets using MedDRA and WHO-D
- Performing data reviews, cleanings and query managements
- Communicating with study teams, statisticians and clients
- Investing in building long-lasting relationships both externally and internally

Your Profile

- You have successfully completed a degree in a medical/technical field and have extensive professional experience in the area of data management
- You bring experience in the area of Good Clinical Practice (GCP)
- You have experience in using EDC software and ideally have knowledge in creating and programming eCRFs
- Knowledge of SAS and good SQL skills are desirable
- You are able to work independently in a team, with profound technical knowledge and readiness for action
- You work in a goal-oriented, structured, conscientious and reliable manner and show initiative
- You have excellent communication skills
- You have a very good command of English, both written and spoken (knowledge of German language is a plus)

If you don’t think you meet all of the criteria below but still are interested in the job, please apply. Nobody checks every box, and we’re looking for someone excited to join the team!
